

October 2021

Chemspec Digital 2021 scored with quality and in-depth expert talks

From 29 – 30 September 2021, the fine & speciality chemicals industry met for the second edition of Chemspec Digital. Once again, the interactive networking event offered an excellent platform for in-depth expert talks and knowledge transfer.

A total of 888 attendees from 49 countries have used the opportunity to log on to the platform to meet, conduct business and learn about the latest trends & developments. 180 exhibiting companies took advantage of the digital offering presenting hundreds of product showcases to allow visitors to virtually explore new products and services in more detail. The intelligent matchmaking system helped suppliers and buyers to connect and as a result, more than 692 dedicated meetings took place throughout the two event days.

“Once again, Chemspec Digital provided a central platform that enables a global industry to meet and conduct business on an international level”, explains Liljana Goszdziewski, Portfolio Director of Chemspec Europe. “Both exhibitors and visitors were highly satisfied with their newly established business relations.”

Furthermore, Chemspec Digital 2021 provided an opportunity for the global fine and speciality chemicals community to gain insights into latest industry knowledge, ongoing R&D projects and innovations. Spanning five theatres, 28 conferences covered some of the most relevant industry topics, such as “Global Crop Protection Industry Market Overview”, “What is new in the chemistry startup scene?”, “UK REACH - current requirements and emerging landscape” and many more. The conference content presented live on the platform was streamed for more than 247 hours during the event.

All conference sessions are still available to view on demand via the platform until 13 October 2021. For more information, please visit www.chemspeceurope.com/digital2021.
